SE451: Software Team Project II

HMI Software Team

Sprint 7 Test Cases and Test Results

TC01: User shall be able to select disability type.

Result: Removed user disability selection screen, because eye tracking for user interface is no longer a feature, and upon startup audio/visual prompts will be displayed/made to allow users to choose additional options.

TC02: User shall be able to control the interface with only eye movements

Result: Removed feature, and pivoted eye tracking to monitor the drivers/riders attentiveness to the vehicle and distracted/sleep prevention while at wheel
